An increasing number of countries, including many in Asia, are developing and implementing low emission development strategies, or LEDS, as the foundation for climate-smart, sustainable economic development. A LEDS is a county-led national strategic analysis and planning process that promotes economic growth while reducing long-term greenhouse gas emission trajectories.

The Asia LEDS Partnership serves as a platform to promote and support low-emission development across the Asia and Pacific region. The partnership supports peer-to-peer learning, knowledge sharing, and improved coordination and cooperation among governmental and non-governmental partners to help Asian countries achieve transformative, sustainable economic growth in the 21st century.

OBJECTIVES

The Asia LEDS Partnership objectives are to:

- Identify and disseminate tools, models, approaches, and best practices to enable low-emission, climate resilient growth and development in the region;
- Foster information exchange, coordination, and collaboration in Asia among programs and countries working on LEDS, in order to maximize results while minimizing duplication;
- Promote capacity building of practitioners to make Asia a leader in designing and implementing LEDS and green growth; and
- Build awareness of and support for LEDS development and implementation across Asia by inspiring and catalyzing leaders of change.

COLLABORATIVE ACTIVITIES

Examples of Asia LEDS Partnership activities:

- Training, expert assistance, and advisory services on LEDS analysis, planning, and implementation.
- Regional workshops on climate finance for officials, finance institutions, banks, and investors.
- Development of a regional training facility to serve as a hub for capacity building on LEDS disciplines.
- Training on low-emission transport, including planning tools, financing, and technology options.
- A LEDS knowledge portal to facilitate dissemination of information and sharing of best practices.
- The annual Asia LEDS Forum to enable sharing and exchange among policymakers, practitioners, and other individuals and organizations in Asia.

A REGIONAL PLATFORM OF THE LEDS GLOBAL PARTNERSHIP

The Asia LEDS Partnership is one of three regional platforms of the LEDS Global Partnership, an international initiative founded in 2011 to enhance coordination, information exchange, and cooperation among programs and countries working to advance low emissions growth. The LEDS Global Partnership currently brings together more than 120 government and international institutions. For more information visit: http://ledsgp.org
GOVERNANCE

The Asia LEDS Partnership is led by two Co-Chairs (noted below) and a Steering Committee comprised of representatives from the following organizations:

- Asian Development Bank (ADB)
- Australian Government Overseas Aid Program (AusAID)
- Cambodia Ministry of Environment, Climate Change Department
- Center for Study of Science, Technology and Policy (India)
- Clean Air Asia
- Climate & Development Knowledge Network (CDKN)
- Global Green Growth Institute (GGGI)
- Indonesia National Council on Climate Change (DNPI) (Co-Chair)
- Institute for Global Environmental Strategies (IGES)
- Japanese International Cooperation Agency (JICA)
- Malaysia Land Public Transport Commission (SPAD)
- Nepal Ministry of Environment, Alternative Energy Promotion Centre
- Philippines Climate Change Commission
- Thailand Ministry of Natural Resources and Environment, Office of Natural Resources and Environmental Policy and Planning
- United Nations Development Programme (UNDP)
- United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP)
- United Nations Environment Programme (UNEP)
- US Agency for International Development Regional Development Mission for Asia (USAID/RDMA) (Co-Chair)
- Vietnam Ministry of Planning and Investment, Department of Science, Education, Natural Resources and Environment
- World Bank Group

MEMBERSHIP

Members of the Asia LEDS Partnership are individuals and organizations within the public, private, and non-profit sectors working to advance low-emission development in Asia. This includes, but is not limited to, Asian government ministries and departments, development organizations, non-governmental organizations, technical or research institutes, and businesses. Membership is voluntary. For information about the Asia LEDS Partnership, please visit www.AsiaLEDS.org, or contact the Asia LEDS Partnership Secretariat.

Through regional forums and training workshops, the Asia LEDS Partnership facilitates peer-to-peer learning and sharing of tools, models, and good practices in low-emission development.

The USAID Low Emissions Asian Development (LEAD) program serves as the Secretariat.
